

TERRANCE HUNT STUDIO

Dear Bob,

I would like to thank you for the excellent job that your company provided for us. Despite the many reputable auction companies we considered, when closing our facilities our decision was made easy when you visited our company. You walked us through the auction process and left no details out. Your honesty in the current machinery marketplace, and your thoroughness made our decision an easy one. We had attended your woodworking auctions in the past and had always paid more for the things we came for, than what we planned. We knew that now the shoe was on the other foot and that we were selling our company assets. We knew we wanted you to make bidders pay more for the things they came for at our auction. Your company's hands on knowledge of woodworking machinery, and the auction industry made you more than qualified to auction our 50,000ft² major high end woodworking furniture manufacturing business.

I was thoroughly impressed through every stage of auction preparation. I enjoyed the involvement you extended us by keeping us up-to-date with details, allowing us to make changes along the way, proofing advertising materials, and always being available to answer all of our questions along the way.

On auction day despite the soft machinery marketplace not only did we have a superb bidder attendance but we also had all the right buyers there to sell all of our equipment. The success of our auction we owe to your knowledge of the industry and your strategic plan from the beginning.

I want to thank you for all your hard work, and doing everything you said you would do! If anytime in the future we may serve as a reference for your company we would be happy to do so.

Thank you,

Terry Hunt
